

Hurin Oleksandr

Frontend / Markup Developer

Senior HTML/Markup Developer with 4+ years of commercial experience, specializing in complex responsive layouts and legacy frontend refactoring. Strong in HTML, CSS/SCSS, and building maintainable UI. Experienced working with Angular and React at the markup level and collaborating through code reviews and team workflows. Brings a strong ownership mindset backed by 8 years of running a business.

Commercial - Projects

Treatfield

Psychotherapy platform built on a legacy stack (**PHP/Yii2 + jQuery**). Focused on frontend refactoring, improving maintainability, and preparing the project for future **React** migration.

Undas

NFT marketplace (discontinued) built with **React** and **Styled Components**. Contributed to frontend development by implementing responsive UI components and animations. Coordinated markup tasks within the team to ensure consistency of UI implementation. Collaborated with designers and participated in testing and debugging to maintain UI quality.

CrimeCash

Blockchain-based game platform built with **.NET** and **Bootstrap**. Developed responsive UI and landing pages, ensuring adaptive layouts and consistent user experience.

Pet - Projects

Email Parser

Email parsing tool built with **React** and **Node.js**, featuring real-time updates via WebSockets. Focused on building responsive UI and handling asynchronous data flow. Built using an AI-assisted workflow to accelerate development and iteration.

Crypto Trading

React-based UI project focused on component structure, **animations (Framer Motion)**, and **Styled Components** usage.

Promo CRM

Frontend project focused on structured markup. Used **BEM**, **Parallax**, **jQuery**, **HTML5**, **CSS3** and **Slick-slider**.

Ai.Man

UI project built with **Tailwind CSS**, focusing on responsive layout and component styling.

Author

Layout project focused on **CSS Grid**, **BEM** and **SCSS**, building structured and maintainable UI.

Work Experience

Senior HTML/Markup Developer Insulalabs

January 2024 - Now (Outstaff)

Developing and maintaining markup based on design layouts

Worked on multiple commercial projects under NDA, focusing on markup development, UI implementation, and frontend consistency

Working with Angular components and templates

Performing code review and improving code quality across the team

Taking ownership of tasks and ensuring task delivery

Collaborating with the team on feature implementation and improvements

Supporting team members and helping with task distribution when needed

Fixing bugs and improving UI stability

Contributing to code quality and frontend consistency across the project

HTML Coder Aff1

April 2023 - January 2024

Developing and maintaining landing pages

Refactoring existing layouts to improve structure and maintainability

Writing JavaScript scripts for UI behavior

Fixing bugs and improving user experience

Collaborating with the team on feature implementation and delivery

Front-End developer Treatfield

December 2022 - now (Part-time)

Refactoring legacy frontend (PHP/Yii2 + jQuery) into a more maintainable structure
Migrating styles from CSS to SCSS with improved structure and reusability
Breaking complex layouts into reusable components
Collaborating with the team on gradual migration to React
Fixing bugs and improving UI stability across the platform
Writing JavaScript (ES6) and improving existing logic
Proactively picking up tasks and coordinating with the team

Junior Front-End developer RedDuck

January 2022 - November 2022

Developing markup for web pages based on design layouts
Working with React and Styled Components
Participating in code review and improving existing code
Fixing bugs and testing application behavior
Communicating with clients and clarifying requirements
Collaborating with the team on task execution

Co-owner, sales manager Junkyard "CarPart"

September 2014 - February 2022

Founded and managed an automotive business
Led client acquisition, sales, and negotiation processes
Managed procurement, pricing, and inventory decisions
Handled end-to-end deal execution and customer relationships
Oversaw daily business operations and financial outcomes

Education

Source IT

JavaScript(Front end)

April 2021 - July 2021

Ukrainian IT School

Front End(Markup Development)

June 2020 - September 2020

National Technical University «Kharkiv Polytechnic Institute»

Telecommunication systems and networks

September 2008 - March 2014
