PROFESSIONAL SUMMARY

Senior Markup Developer / HTML-CSS Developer with 4.5+ years of commercial frontend experience focused on HTML/CSS/SCSS, complex responsive UI, reusable components, and safe legacy refactoring. Delivered around 20 commercial web projects in an outstaff environment and continue modernizing a long-running production HealthTech platform. Strong in code review, UI quality, regression-risk awareness, and turning complex Figma designs into maintainable interfaces. Practical experience includes JavaScript/TypeScript for UI work, Angular templates/components, React and Styled Components, and AI-assisted engineering workflows.

TECHNICAL SKILLS

Core: HTML5, CSS3, SCSS/Sass, responsive & adaptive layout, semantic HTML, Flexbox, CSS Grid, BEM, pixel-accurate UI
UI / Framework experience: Angular templates/components, React UI, Styled Components, Bootstrap

JavaScript / TypeScript: UI behavior, DOM, small interactive features, jQuery maintenance and gradual legacy refactoring

Tools & workflow: Git, Figma, Jira, code review, visual QA, UI debugging, reusable component development, legacy frontend refactoring

AI-assisted development: Codex and ChatGPT for codebase analysis, usage tracing, implementation planning, refactoring, migration planning, test planning, and code review support

PROFESSIONAL EXPERIENCE

InsulaLabs | Remote | Jan 2024 - Sep 2026

Senior Markup Developer | Jul 2025 - Sep 2026

- Delivered responsive, production-ready interfaces for ~20 commercial web projects, all released to production.
- Worked in a 4-person markup/frontend team, usually contributing to 1-2 projects at a time and supporting other teams when additional frontend capacity was needed.
- Performed daily code reviews across team merge requests, helping maintain shared markup quality, responsive behavior, and frontend standards.
- Mentored and onboarded 6-7 newly hired middle-level developers, helping them get up to speed with project workflows, coding standards, and review practices.
- Built and maintained reusable SCSS mixins and project-level UI patterns to reduce repetitive styling and keep implementation consistent.

Middle Markup Developer | Jan 2024 - Jul 2025

- Built responsive, cross-browser interfaces from complex design layouts and supported consistent delivery across commercial projects.
- Applied and helped maintain team coding standards based on BEM/SMACSS, participated in code reviews, and collaborated with designers, QA, backend developers, business analysts, and PMs.

TreatField | Frontend Developer (Part-time) | Dec 2022 - Present | HealthTech

- Maintain and modernize the frontend of a long-running production platform, contributing across most major areas of the product since December 2022.
- Initiated and developed an internal UI Kit and reusable component foundation to improve UI consistency and support gradual modernization of the legacy frontend.
- Refactored a legacy 10,000+ line SCSS structure into approximately 200 smaller modules, making styles easier to navigate, reuse, and maintain.
- Replaced approximately 100 Font Awesome icons with an SVG sprite system, enabling complete removal of Font Awesome from the frontend.
- Built reusable UI components and shared patterns during refactoring, preserving existing behavior, minimizing regression risk, and fixing legacy UI issues discovered along the way.
- Standardized article presentation by replacing inconsistent formatting and spacing with shared semantic styling rules while improving complex responsive layouts across the product.

Aff1 | HTML Coder | Apr 2023 - Jan 2024 | Remote

- Produced and adapted high-volume marketing landing pages, typically handling 1-3 landing-page tasks per day depending on scope.
- Built approximately 10-15 responsive landing pages from scratch and adapted existing pages for campaigns, localization, content changes, and responsive fixes.
- Worked with HTML, CSS, and JavaScript on production marketing pages, including small interactive features and UI modifications.

RedDuck | Frontend Web Developer | Jan 2022 - Nov 2022

- Started commercial frontend work on two product projects, building responsive and cross-browser interfaces under senior developer review.
- Developed the frontend of the CrimeCash crypto game using HTML/CSS within a .NET-based project.
- Later worked on the Undas NFT exchange/marketplace with React and Styled Components, building responsive UI from scratch and taking on more complex frontend tasks.
